

July - November, 2020

UPON INVITATION

AQUA WEBINAR SERIES by **ADISSEO**
A Bluestar Company

Adisseo is pleased to announce its Aqua Webinar Series. During these last months, Covid-19 impacted our daily life and way of running our business. The aim of this webinar series is to help relieve what we all missed most while not being able to participate in conferences and exhibitions: **get direct information from industry colleagues on the potential impact of COVID-19 on our business, and receive technical updates on hot topics relevant to aquaculture nutrition and health.**

To fill this gap, Adisseo organizes one webinar per month during July – Nov related to the impact of COVID-19 on aquaculture, combined with a number of technical seminars on topics relevant to aquaculture nutrition and health management.
