

NUTRITIONAL ADDITIVES FOR SWINE PRODUCTION

ADISSEO'S SOLUTIONS ARE DESIGNED TO SUPPORT PRODUCERS IN ALL PRODUCTION STAGES. THE FEED ADDITIVES WE OFFER PLAY A PIVOTAL ROLE IN OPTIMIZING PERFORMANCE AND PROFITABILITY.

ESSENTIAL NUTRIENTS

METHIONINE,
VITAMINS

FEED INTEGRITY

ANTIOXIDANTS,
MYCOTOXIN
DEACTIVATORS

FEED PALATABILITY

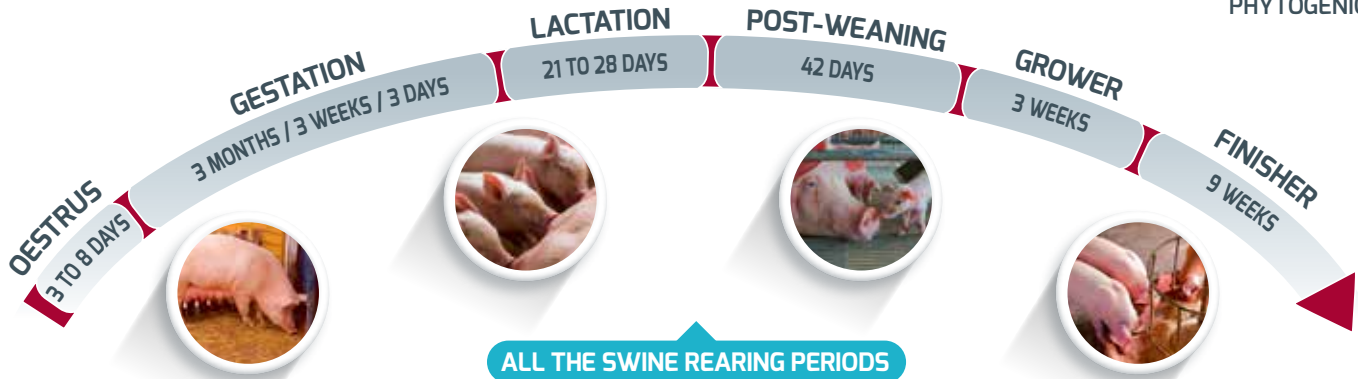

PALATABILITY
SOLUTIONS

FEED DIGESTIBILITY

EMULSIFIERS,
ENZYMES

ANIMAL RESILIENCE

BUTYRATE,
GLYCERIDES,
ORGANIC SELENIUM,
PHYTOGENICS

SOWS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Boost the development of piglets

FRA® C12

- ▶ Boosts the development of piglets
- ▶ Reduces bacterial stress in the farrowing shed

FRA® LECIMAX

- ▶ Improves the conditions and performance of sows by enhancing the absorption of fat

KRAVE AP

- ▶ Increases the lactation feed intake, milk production and litter weight at weaning by increasing palatability

RHODIMET® AT88

- ▶ Enhances milk content in fat, lactose or protein
- ▶ Reduces losses in the body weight and back fat thickness

ROVABIO®

- ▶ Maintains the condition of sows through better digestibility
- ▶ Improves milk production and piglet weight

SELISSEO®

- ▶ Improves fertility
- ▶ Enhances the selenium content and transfers immunity to piglets

UNIKE PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Prevents damage of such organs as the reproductive system

PIGLETS POST WEANING

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Increase intestinal growth and recovery after weaning atrophy
- ▶ Reduce inflammation and a leaky gut
- ▶ Increase resilience against bacterial imbalance

APEX 5

- ▶ Improves gut health
- ▶ Controls the inflammatory response
- ▶ Keeps the microbial composition of the gut in balance

DELISTART

- ▶ Stimulates feed intake and liveweight gain in young pigs, both pre and post weaning

FRA® BUTYRIN ULTRA

- ▶ Increases intestinal growth and recovery after weaning atrophy
- ▶ Reduces inflammation and a leaky gut

FRA® C12

- ▶ Has bacteriostatic effects against Gram+, e.g. *S. suis*
- ▶ Modulates the immune response

FRA® LECIMAX

- ▶ Improves performance by enhancing fat digestion

ROVABIO®

- ▶ Improves the weight gain by alleviating the effects of antinutritional factors

SELISSEO®

- ▶ Improves the immune response
- ▶ Improves the antioxidant capacities of piglets

UNIKE PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Prevents damage of such organs as the GIT and boosts the immune system

GROWERS & FINISHERS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Keep the digestive performance and gut health on track

APEX 5

- ▶ Keeps digestive health on track to support a good FCR
- ▶ Keeps the microbial composition of the gut in balance

FRA® LECIMAX

- ▶ Decreases feed costs by improving fat digestion

ROVABIO®

- ▶ Reduces feed costs by improving feed digestibility

SELISSEO®

- ▶ Improves meat quality parameters (higher selenium content)
- ▶ Improves the antioxidant status

TOXY-NIL PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Minimizes any immune depression and cell oxidation caused by mycotoxins

SOWS - PIGLETS POST WEANING - GROWERS & FINISHERS

ADISODIUM

MICROVIT®

OXY-NIL

- ▶ Protects feed materials sensitive to oxidation
- ▶ Safeguards the energy content and nutritional value of the feed

RHODIMET®
