

NUTRITIONAL ADDITIVES FOR POULTRY PRODUCTION

ADISSEO'S SOLUTIONS ARE DESIGNED TO SUPPORT PRODUCERS IN ALL PRODUCTION STAGES. THE FEED ADDITIVES WE OFFER PLAY A PIVOTAL ROLE IN OPTIMIZING PERFORMANCE AND PROFITABILITY.

ESSENTIAL NUTRIENTS

METHIONINE,
VITAMINS

FEED INTEGRITY

ANTIOXIDANTS,
MYCOTOXIN
DEACTIVATORS

FEED PALATABILITY

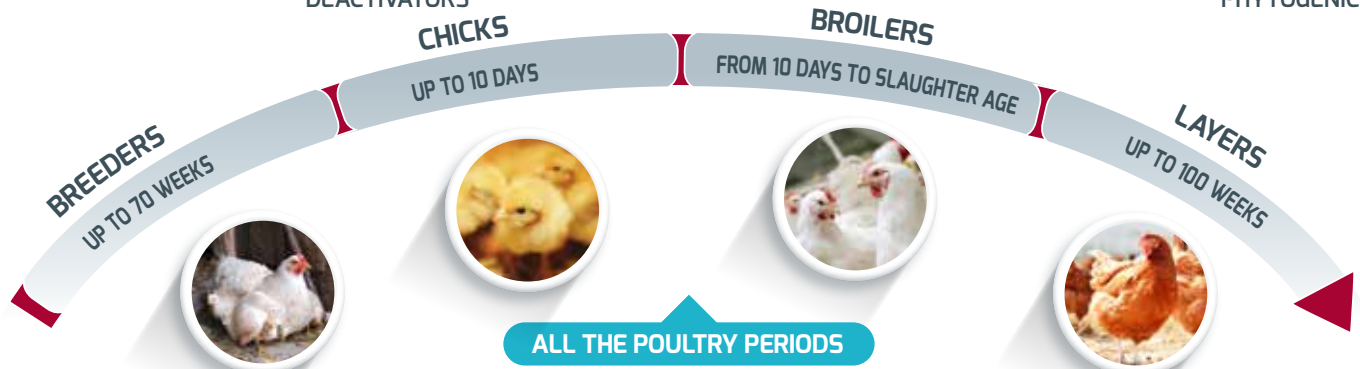

PALATABILITY
SOLUTIONS

FEED DIGESTIBILITY

EMULSIFIERS,
ENZYMES

ANIMAL RESILIENCE

BUTYRATE GLYCERIDES,
ORGANIC SELENIUM,
PHYTOGENICS

BREEDERS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Increase the development and uniformity of pullets
- ▶ Delay a drop in the laying performance and eggshell quality of older hens

APEX 5

- ▶ Controls the inflammatory response
- ▶ Ensures a balanced microbial activity of the gut during the laying period

FRA® C12

- ▶ Has bacteriostatic effects against Gram +
- ▶ Modulates the immune response

FRA® LECIMAX

- ▶ Increases performance by improving the pigment and linoleic acid absorption

ROVABIO®

- ▶ Reduces feed costs by releasing extra energy, amino acids and phosphorus from the feed
- ▶ Increases the value of alternative feed ingredients

SELISSEO®

- ▶ Improves fertility and hatchability
- ▶ Enhances the selenium content of eggs and thus the antioxidant status of the developing embryo & day-old chicks
- ▶ Prolongs and maintains the egg production of aging flocks

UNIKE PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Prevents damage of such organs as the reproductive system

CHICKS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Support early gut development
- ▶ Hinder the colonization of the gut by harmful bacteria

ALTERION®

- ▶ Helps young birds, with an immature gut, to develop a beneficial microbiota faster
- ▶ Supports the development of the immune system

FRA® C12

- ▶ Has bacteriostatic effects against Gram +, e.g. *Enterococcus*
- ▶ Modulates the immune response

FRA® LECIMAX

- ▶ Increases performance by improving fat digestion
- ▶ Decreases feed costs

ROVABIO®

- ▶ Reduces feed costs by releasing extra energy, amino acids and phosphorus from the feed
- ▶ Increases the value of alternative feed ingredients

SELISSEO®

- ▶ Improves the immune and inflammatory responses
- ▶ Improves the Se status and the antioxidant capacity of young chicks to cope with stress

TOXY-NIL PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Prevents damage to such organs as the GIT
- ▶ Boosts the immune system

BROILERS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID

- ▶ Reduce a leaky gut
- ▶ Support wound healing
- ▶ Increase resilience against a bacterial imbalance

ALTERION®

- ▶ Positively influences the microbial ecology
- ▶ Controls the inflammatory response
- ▶ Strengthens the gut barrier

APEX 5

- ▶ Keeps digestive health on track during the life cycle to support a good FCR
- ▶ Keeps the microbial composition of the gut in balance

FRA® BUTYRIN ULTRA

- ▶ Reduces a leaky gut
- ▶ Supports wound healing

FRA® C12

- ▶ Has bacteriostatic effects against Gram +, e.g. *Clostridium perfringens*
- ▶ Modulates the systemic immune response

FRA® LECIMAX

- ▶ Increases performance by improving fat digestion
- ▶ Decreases feed costs

ROVABIO®

- ▶ Reduces feed costs by releasing extra energy, amino acids and phosphorus from the feed
- ▶ Increases the value of alternative feed ingredients

SELISSEO®

- ▶ Improves the immune and inflammatory responses
- ▶ Improves the Se status and the antioxidant capacity of young chicks to cope with stress

TOXY-NIL PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Prevents damage to such organs as the GIT
- ▶ Boosts the immune system

LAYERS

ADIMIX PRECISION, FRA® BUTYRIN HYBRID, FRA® BUTYRIN ULTRA

- ▶ Increase the development and uniformity of pullets
- ▶ Delay a drop in the laying performance and eggshell quality of older hens

APEX 5

- ▶ Controls the inflammatory response
- ▶ Ensures a balanced microbial activity of the gut during the laying period

FRA® LECIMAX

- ▶ Increases performance by improving fat digestion, and enhances the pigment and linoleic acid absorption
- ▶ Decreases feed costs

ROVABIO®

- ▶ Reduces feed costs by releasing extra energy, amino acids and phosphorus from the feed
- ▶ Increases the value of alternative feed ingredients

SELISSEO®

- ▶ Promotes a high egg production, in particular in aging layers
- ▶ Improves egg quality
- ▶ Enriches the Se in eggs

TOXY-NIL PLUS

- ▶ Adsorbs and bio-inactivates mycotoxins
- ▶ Minimizes the immune depression and cell oxidation caused by mycotoxins

BREEDERS - CHICKS - BROILERS - LAYERS

ADISODIUM

MICROVIT®

MICROVIT® E

OXY-NIL

- ▶ Protects feed materials sensitive to oxidation
- ▶ Safeguards the energy content and nutritional value of the feed

RHODIMET®
